

APSIC 2011

BD Sponsored Pre-Conference Workshop

Tuesday, November 8, 2011

@ Melbourne Convention and Exhibition Centre

Please join us in exploring

“The Reality of Health Economics in Infection Control”

Facilitated by Dr Bill Jarvis

This workshop is brought to you by BD – *Helping all people live healthy lives.*

Objectives

- Discuss the relationships between Health Economics and Infection Control practice.
- Describe methods that can be applied to evaluate practices and technology in terms of return on investments.
- Consider practical contemporary examples of how economic evaluation is applied to decisions regarding implementation of new methodologies and technologies and perceived impact on healthcare acquired infection prevention.
